

# RYDIS H68 Pro Wheel Replacement

Taking apart and replacing the wheel system on a RYDIS H68 Pro.

Written By: Shawn O'Meara

## INTRODUCTION

Wheels not working properly? Follow this guide for steps on how to replace the wheel system on a RYDIS H68 Pro.

---

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
  - [Metal Spudger](#) (1)
-

## Step 1 — Battery

- Flip the vacuum over so that the wheels are facing you.
- Use a Phillips #1 screwdriver to remove the four 10mm screws that surround the battery cover.

## Step 2

- Lift up the battery cover to reveal the battery.
- Remove the battery.

## Step 3 — Bumper

- Remove the eight 10 mm Phillips #1 screws.

## Step 4

- Hold the front bumper and pull it off.
- ⓘ It requires a lot of force to pull the bumper off.

## Step 5

- Pry off the back bumper by going around the entire top of the bumper with the metal spudger.

## Step 6 — Wheel assembly

- Remove three 10mm Philips #1 screws that are securing the wheel assembly.

## Step 7

- Remove the 10mm Phillips #1 screw securing the spring.
- Then undo the spring from the plastic hook to completely remove it from the wheel assembly.

## Step 8

- Lift up on the plastic piece to remove the entire wheel assembly.

## Step 9

- Remove the plastic frame by pulling outward on the two spots where it is fastened.

## Step 10

- Remove the four 10mm Phillips #1 screws around the edges of the cover.

## Step 11

- Lift up on the top cover to remove it.
- Removing the top cover reveals the gear system consisting of three gears.

To reassemble your device, follow these instructions in reverse order.
